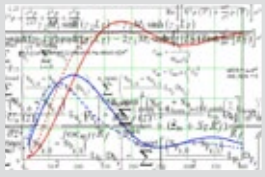
# 43” wide...6½” tall...*47Hz deep*

# Subwoofer no longer required

H-PAS™
*Hybrid Pressure Acceleration System*



The H-PAS PowerBar 235 is a 43”-long self-powered soundbar that delivers multichannel high-fidelity sound for your home entertainment system. It features Atlantic’s patented H-PAS™ bass system, which produces deep, distortion-free bass without the need for a subwoofer! You (or your spouse) will no longer have to play that favorite parlor game – **“Hide The Sub.”**

Utilizing just two 4” drivers, the H-PAS PowerBar 235 miraculously achieves a solid 47Hz at theater-like SPLs, for an absolutely convincing and totally satisfying sonic experience. Because of its extended frequency response and dynamics the H-PAS PowerBar 235 is the first soundbar where the subwoofer is truly optional.

This represents a quantum leap in both acoustic technology and user convenience.

The H-PAS PowerBar 235 is driven by an on-board 80 Watt amplifier. It also includes sophisticated Digital Signal Processing with Dolby Digital® and DTS® that delivers two-channel sound and effectively develops a 3, 5 or 5+ channel experience for total listener immersion in the video. A simple remote controls included, but is compatible with most universal remotes.
